***Graduation Growth:** Because students graduate throughout the summer, graduation data is one year lagged. This figure represents the graduating class of 2024.

****Math/Reading Growth:** A student's peers for growth are others in their grade who had the same score on a previous year's test. The median growth of a school or district is the growth of the middle student of that school or district. A student at the 50th percentile of growth has typical growth for their peer group, while a student at the 70th percentile has more than typical growth for their peer group.
