

## Summer Reading List for Upcoming 3rd Graders

*This is a list of beginning chapter book series for children reading on grades levels of 2-3. I've included the title, the author, a brief description, the Lexile levels, and the AR levels to help you find a series that will be perfect for your child. Most of these books can be found in your public library, but you can also purchase these books if you like. Some books may be found as a read aloud on YouTube (just type in the story title and it should come up if it's available). I've also divided the list by lower and higher levels. I have also included an extra list of books that are more culturally diverse. Please see the last page for the assignment that will be due the first week of school. Also, please feel free to read books that are not on this list. The important thing is to practice reading books and to read new books. Keep a journal to write ideas, words you need to look up, or anything else you want to write or draw while you are reading.*

\*This assignment will be collected the first week of school and counted as a grade. Please use the page provided or write it on your own paper using the same format with your name on it to turn in the first week of school.
